

The best electric bikes 2023

Volt London | £2299 | Urban

The sleek and beautifully designed Volt London is primed for the urban jungle, offering great value and a pleasing ride. Like the Flit-16 folder, it also uses Bafanag's rear-hub battery and motor, which suits both commuting and leisure riding in equal measure. The London's 504Wh battery makes it good for up to 70 miles of range.

At just over £2000, the bike comes ready to ride with a front rack and mudguards, which is good value considering its mix of both commuting and leisure riding credentials.
